- **Delegates will be split-up in 3 groups, each group will be led by a chair person. Members receive results for quality indicators for their own country before the workshops.
- *** Delegates will be split-up in 3 groups, each group will be led by a chair person

Deliverables

1. Results on use of quality indicators as presented in medical, social records and vignettes
2. Information on feasibility: availability of information and barriers and facilitators to the use of these quality indicators
3. Differentiation between quality indicators applicable in all EU countries and applicable in EU countries with advanced healthcare systems
4. Research questions call EU
5. Hypotheses about the variation in use of dementia services and psychosocial interventions in Europe on macro, meso and micro level
6. Report on variation in use of quality indicators on psychosocial interventions in Europe and its feasibility
7. Translation and publication of key messages in professional journals in participating countries.

Preparations of delegates

- Delegates should work with the indicators and therefore the data extraction form should be used by them within their own organization/service. We will ask them to gather data for 10 patients and to send these data to Emmelyne before September 16.
- Delegates should read the EU-call: *Commission steps up action on Alzheimer's disease and other neurodegenerative conditions.*
